-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I in the reply filed on 28 January 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 11-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 200-012054 (JP 054) in view of Aonuma et al., US No 4,885,341 and further in view of Udagawa et al., US No. 6,517,085.

JP 054 discloses a method comprising mixing a rubber powder having a certain average size with a liquefied rubber. The liquefied rubber may then be applied to a surface (see *SOLUTION*).

JP 054 does not disclose the rubber powder comprising a first rubber powder and a second rubber powder, or the rubber being applied to a rigid plate.

Aonuma discloses mixing first and second rubber in order to achieve a vulcanizate having resistance to gas permeability (col. 1, lines 1-3).

Art Unit: 3676

Udagawa discloses coating a rigid plate (*gasket*) with a rubber composition in order to protect its surfaces.

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify JP 054 to include the first and second rubber components for the purpose of increasing vulcanizing properties and resistance to gas permeability (col. 1, lines 1-3), and further to apply the composition to a rigid plate in order to protect the plate (*gasket*) surfaces.

Examiner Note: The particulars as to the ratio between the powders are considered to be a matter of optimization.
